# SEMICONDUCTOR CROSS REFERENCE

## on CD-ROM

### *Enhanced Version*

A complete guide to semiconductor replacement and substitutions from the makers of PHOTOFACT(R) service documentation.

More than 490,000 part numbers, type numbers, and other identifying numbers listed.

Includes part numbers for the United States, Europe, and the Far East.

Covers all major types of semiconductors: bipolar transistors, FETs, diodes, rectifiers, ICs, SCRs, LEDs, modules, and thermal devices.

Replacement for NTE, ECG, Radio Shack, and TCE - four cross references in one!

Up-to-date list of original equipment manufacturers.

The most comprehensive replacement data available for engineers, technicians, and all those who work with semiconductors.

Minimum System Requirements:

Windows 95(R) or higher and 60 MB of free disk space
